

TASTE THE FEELING™

# POST MIX SANITISATION

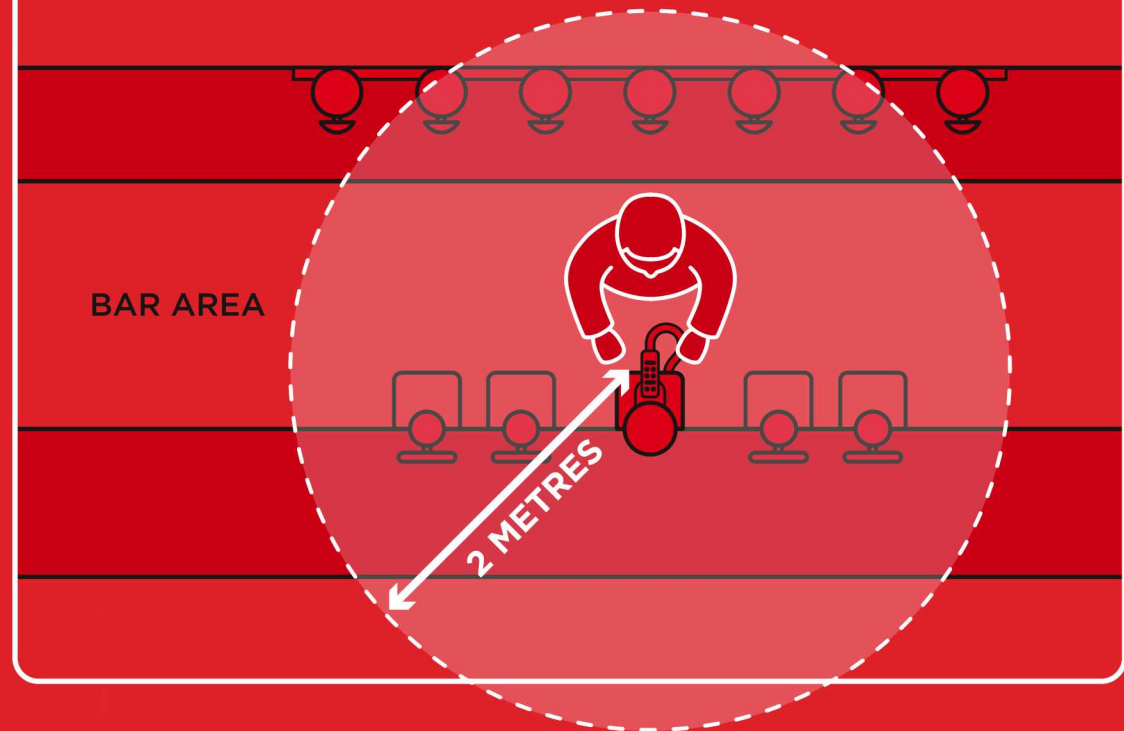

ENSURING THE SAFETY  
OF OUR ENGINEERS  
AND CUSTOMERS  
DURING SITE VISITS

## REQUIRED ON SITE READY FOR OUR ATTENDANCE

- 1 CO2 must be onsite and available in all outlets
- 2 In date BIB Syrup (must be on site in outlets that are due to open within 30 days)

## SOCIAL DISTANCING AND STAFF SAFETY

- Social distancing must be maintained to minimise risk of infection for our own and customers teams, therefore our machines must have nobody within 2m of the machine for the duration of our engineers visit to enable CCEP to complete works safely. The social distancing will be required front of house and also back of house i.e. in the cellar etc

**IMPORTANT NOTE:** Our Engineer is empowered to leave your site at any time if social distancing isn't maintained

## TIMINGS/DURATION OF VISIT

- Our visit will take on average 2.5 hours to complete depending on the size of the outlet (larger outlets may take longer)
- Our engineers will require access to premises between no earlier than 8am with our last visit starting no later than 4pm

## OUR PROCESS

- 1 We will agree a day that we will visit your outlet via our customer service team
- 2 Upon arrival our engineer will call your outlet whilst outside before entering the building to ensure the social distancing measures are in place before entering the building
- 3 Engineer will then enter the building to complete the sanitisation works

## WHAT DO WE REQUIRE FROM YOU?

- ✓ Maintain Social Distancing
- ✓ Be prepared to cease trading for duration of visit if social distancing can't be maintained
- ✓ Access - Be on site at agreed time (If access is not available a revisit will be arranged at CCEP convenience)
- ✓ CO2 - Available on site

**IMPORTANT NOTE:** Our Engineer is empowered to leave your site at any time if social distancing isn't maintained
